Employer Preparedness Plan requirements checklist

Employers must develop and implement a plan that addresses the following components and post it publicly.

If workers can work from home, they must be allowed to work from home.

Make sure sick workers stay home

- 1. Establish health screening protocols for workers at the start of each shift, such as temperature taking or a health screening survey.
- 2. Identify and isolate workers with COVID-19 symptoms and those who have been exposed, and send them home.
- 3. Establish communication protocols when workers have been potentially exposed.
- 4. Establish worker sickness reporting protocols.
- 5. Evaluate and adjust sick leave policies to reflect the need for isolation and incentivize workers who are sick to stay home.
- 6. Provide accommodations for vulnerable populations.
- 7. Clearly communicate sick leave policies to all workers.

Increase social distancing: Workers should be at least six feet away from each other

- 1. Maximize the use of telecommuting.
- 2. Stagger shifts and breaks; create additional shifts.
- 3. Evaluate traffic patterns to reduce crowding at entrances, in hallways, etc.
- 4. Limit gatherings of workers.
- 5. Ensure physical distancing in workplaces, including at workstations, productions lines, etc.
- 6. Limit non-essential worker interaction across floors, buildings, campuses, worksites, etc.
- 7. Increase physical space between workers and customers, such as using a drive-thru or partitions.

Worker hygiene and source control

- 1. Ensure workers regularly wash their hands. Ensure handwashing and/or hand-sanitizer facilities are readily available and stocked.
- 2. Provide recommended protective supplies, such as non-medical cloth masks, gloves, disinfectant, guards, shields, etc.
- 3. Post handwashing and "cover your cough" signs.
- 4. Encourage use of source control masks, such as non-medical cloth masks.
- 5. Prohibit on-site food preparation and sharing.

Cleaning and disinfection protocols

- 1. Routinely clean and disinfect all areas, such as offices, bathrooms, common areas, shared electronic equipment, machinery, tools, controls, etc.
- 2. At least daily, clean all high touch items like door knobs, handles, light switches, surfaces, etc.
- 3. Ensure availability of hand sanitizer and approved cleaning products.
- 4. Decontaminate the workplace if a worker becomes ill with COVID-19.

All workers – management and employees – must be trained in these protocols.
